

ADLB003 - Animation Bundle 3 - Road Manoeuvres

This Bundle contains three sets of animated video clips:

Moving Off & Stopping

Meeting

Overtaking

ADL001 - Animation Download - Moving Off & Stopping

Clip 1: Manoeuvre (01:05) This clip is split into two sections titled Moving Off and Stopping. The first clip shows the Prepare - Observe - Move sequence on screen. This allows the instructor to pause and ask the student what actions they should make within each part. The mirrors flash green in the Observe sequence and the indicator comes on prior to the Move. In the Stopping scene the Mirror - Signal - Manoeuvre routine is highlighted again showing the mirror checks and timing of the indicator.

Clip 2: Observations (01:22) Again, split into two sections titled Moving Off and Stopping. The animation is the same as above, without the routines but with the addition of the observation radar effect. The Stopping scene also highlights the considerations for a safe, legal and convenient location as well as stopping a safe distance from the kerb and other vehicles.

Clip 3: Hazards (01:41) Also split into two sections, Moving Off and Stopping, this clip shows examples of the typically hazards that occur when carrying out this manoeuvre. The observation radar effect highlights, by turning red, when a potential hazard is spotted.

ADL007 - Animation Download - Meeting Traffic

Clip 1: Priority (01:47) This clip is split into three sections, Holdback position: illustrates and explains the best position to hold back, Priority #1: parked vehicle on the nearside and Priority #2: parked vehicle on the offside. In these clips a combination of radar effects, hazard and text flashes are used to illustrate a safe and considerate routine.

Clip 2: Hazards (01:27) This clip shows a road with parked vehicles and entrances on both sides of the road. The observation radar effect is used here to show the direction of the 'L' car driver's observations and when hazards are in view. Hazards flash red when they come into view and text flashes highlight some of the common errors. A great clip for coaching and creating discussion.

ADL008 - Animation Download - Overtaking

Clip 1: Manoeuvre (00:31) The clip shows the overtake manoeuvre carried out on a single lane carriageway.

Clip 2: MPSL & 2 Second Rule (01:27) This clip illustrates the MPSL holdback routine and the 2 second rule. It shows how to judge a safe gap and illustrates solid white line markings.

Clip 3: Zone of Vision & MPSL (00:49) This clip uses the Zone of Vision radar effect to illustrate the blind area created by travelling too close behind another vehicle. It then illustrates the MPSL routine and then the MPSL routine when overtaking.
